Roll-off container covers are a **LIGHTWEIGHT, DURABLE, AFFORDABLE** solution for covering the contents of roll-off containers.

**FEATURES & BENEFITS**

- Open to 90 degrees for easy access to entire container
- Lockable to protect container from theft and unauthorized dumping
- Built with UV-protected, impact-resistant high density polyethylene (HDPE)
- Standard design is permanently mounted and travels with the container at all times

Meet EPA regulations for storm water exposure.
Available in 3 custom configurations:

**Standard**- Cover is permanently mounted and travels with the container.

**Removable**- Cover includes clamp on hinges and fork pocket frame for easy transfer to other containers.

**Stand-alone**- Cover is mounted on a frame attached to existing concrete slab or footing. The stand-alone configuration allows containers to be swapped out from underneath cover.
Ability to maintain total container functionality even when cover is securely fastened.

Opens to 90 degrees for access to entire container.

Integrated forklift pockets molded into cover make transferring fast and easy.

To ensure proper opening and closing functionality there will be a gap of up to 2” between the cover and top of container.
Available for order:

- Pre-installed on new Wastequip roll-off containers
- Sold separately for mounting on existing containers
